27 February 2020

Tech Nation recently announced the 10 winners of Rising Stars 2.0, the UK's national startup competition, designed to showcase and raise the profile of the best early-stage tech companies from across the country.

The concept? Entrants are supported throughout the application process and given training and advice at each stage of the competition to enable startups to compete to their best ability.

The competition took place in London where 20 companies were selected by Tech Nation's judging panel to pitch to a high profile panel and audience and try to be one of the 10 Rising Stars.

“The Rising Stars announced today are great examples of the strength of the UK tech ecosystem,” - Mike Jackson, entrepreneur success director of Tech Nation

The winning tech startups were...

We Build Bots from Cardiff, delivers AI-powered automation to the public sector, helping organisations deliver better, faster and cheaper citizen services. Leveraging bots, voice and conversational analytics, they help the public sector make better use of the data they collect, making it more predictive and more productive.
