

10 startups to watch in Leeds

Maddyness has compiled a list of some of the most innovative businesses operating in Leeds.

Temps de lecture : minute

9 March 2020

In 2019, 681,704 businesses were created in the UK (with 17,401 registered in London), according to a survey from the Centre for Entrepreneurs, which indicates an increase of 2.8% compared to 2018. In Yorkshire, nearly 6% more businesses were created across the region (38,269) with 7,492 in Leeds alone, ranking it as the fourth most attractive city in the UK for startups.

So which startups are blooming in Leeds, the vibrant evolving city in the heart of Yorkshire? Whether it's health, gaming or data science, Maddyness brings you a list of some of the most innovative businesses driving this emerging hub.

Synap is an intelligent, learning management system that focuses on breaking down large training topics, making it easy for staff to engage with their training anytime, anywhere. Working closely with large organisations, SMEs and training providers, Synap offers face-to-face training with online learning, making it more accessible and manageable for staff to progress with their professional development. Synap has all the benefits of a traditional learning management system and supports all e-learning content types, such as videos, presentations, documents and SCORM files.
