

Landscape Lists name Europe's Top 20 Seed Investors

Continuing a recent emphasis on separating the good from the bad actors in the venture capital market, anonymous venture capital review site Landscape launches Landscape Lists, a service that aggregates anonymous founder feedback to highlight top performing venture capitalists and funds.

Temps de lecture : minute

24 March 2022

Anonymous venture capitalist (VC) review site Landscape has launched a new service that looks to highlight the best VCs based on anonymous founder feedback, called Landscape Lists.

The first list is drawn from 200 reviews and 200 investor profiles and names the top 20 European seed investors. The entire list can be found below.

Since its launch in 2020, Landscape has expanded its services to include an anonymous founders slack community, a founder discount marketplace, and OpenScout, a new Scout-as-a-Service offering that is due to launch this year.

“Since starting Landscape I’ve always said our review site isn’t just about helping founders avoid the bad actors, but also about highlighting the most founder friendly investors out there,” commented Joe Perkins, founder of Landscape Lists. “Landscape Lists is our next step in helping founders connect with the best investors.”

Landscape Lists want to develop their offering by publishing lists

specifically tailored to feedback criteria or demographics. As such, lists that chart the “Top Funds for Female Founders” or “Europe’s Most Supportive Investors” are expected in the future. New lists will be added to the Landscape site and reviewed every three months as reviews grow.

The first Landscape List, charting the Top 20 European Seed Funds can be found below, in a list that is unranked and alphabetical.
